

My Jolly Summer Activities

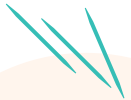

Build Your Own Water Slide!

There's no better way to cool off on a hot summer day than an exciting trip down the water slide! This summer, create your own Jolly Roger® Splash Mountain water slide and send your toys slipping and sliding down in your own backyard! Be sure to print out your Jolly Roger® Splash Mountain flags to mark your slide as your toys slide down!

Materials

Pool Noodle

Toothpicks

Marble, Car, or Small Doll

Container of Water

How to Play

- 1. Create Your Slide:** Begin by asking your parent or guardian to carefully cut your pool noodle in half. You should end up with two sides with slight indents down the middle.
- 2. Connect Your Slide:** Ask your parent or guardian to then connect both sides of the pool noodle with toothpicks so they stay together side by side.
- 3. Set Up Your Slide:** Prop one side of your noodles up on a crate, table, or other similar object. Lean the other side of your pool noodle into a container, carefully filled with water.
- 4. Print Your Flags:** Who wants to play with a plain water slide? Print out your Jolly Roger® Play Flags and set them up along your track for added fun and flair.
- 5. Time to Slide!:** Gather your toys and slide! Send small dolls, cars, or even marbles down your track and tag Jolly Roger® Amusement Parks on Facebook so we can see your amazing creations!
